This webinar explores Remote Patient Monitoring and how it is being implemented across a range of health settings in Aotearoa. Hear real-world insights from the Northern Region's Hospital in the Home programme, a nurse practitioner supporting heart failure patients in Hawke's Bay, Hato Hone St John, and a marae-based health service.

Speakers will share the benefits they've seen, the challenges they've faced, and the key lessons learned along the way. Whether you're just starting to explore RPM or already on the journey, this session offers practical perspectives from the front line of care.
