

YOU'RE INVITED TO A **ZOOM WEBINAR**

CKD FOR PRIMARY CARE PRACTITIONERS

A NEPHROLOGIST'S PERSPECTIVE

**WEDNESDAY 12 MARCH,
7PM – 8PM**

DR ANDY MCNALLY

Medical Advisor, Kidney Health NZ

Kidney disease often has no symptoms until it's advanced, making early detection crucial for prevention and better outcomes.

Timed to coincide with World Kidney Day, learn about:

- Key signs and risk factors of kidney disease
- Tools for early detection
- Practical strategies to support patients in protecting kidney health

Andy has been working as a Consultant Nephrologist at Hawke's Bay Fallen Soldiers' Memorial Hospital since 2015. He is dedicated to delivering holistic medical care to his patients. Andy joined the Kidney Health New Zealand team as Medical Advisor in July 2024. He is appreciating the opportunity to support kidney health promotion, prevention, education, and advocacy. Primary Care Practitioners are an integral part of this teamwork.

This webinar is designed for primary care teams, including GPs, NPs, Practice Nurses, HIPs, and anyone involved in health promotion and improving health literacy.
