

MENTAL HEALTH RISK ASSESSMENTS IN THE ED

**Thursday 26 February,
7.00 – 8.00pm**

SARAH ALLEN RN, BN, M. Health Sci, DAO

*Charge Nurse Manager Older Persons Mental Health
Service – Te Tau Ihu, Regional SPEC lead, Risk
Assessment & Management Portfolio*

Not all EDs across the country have access (and/or timely access) to a mental health liaison team and many nurses and doctors are having to make decisions regarding risk. Also, given the current climate, with a limited number of care partners around, many nurses are having to decide out of the 17 patients requiring a care partner, which 10 patients will get one. Join us to learn more about:

- Building rapport in the acute care space
- Acute assessment
- Basic risk management
- Risks related to the ED environment
- Initiating and de-escalating 1:1 care
- Mental Health Act

Sarah is a registered nurse with 11 years' experience working in acute mental health services in the Nelson region. She has worked in a variety of roles including Inpatient, Crisis, Clinical Nurse Specialist and Education and has a passion for supporting least restrictive practices and working to reduce the stigma associated with mental health and addictions.
