

YOU'RE INVITED TO A **ZOOM WEBINAR**

# SUPPORTING THE BARIATRIC PATIENT

**WEDNESDAY 3 SEPTEMBER,  
7PM – 8PM**

## **MR RICHARD BABOR**

*General, Upper GI & Bariatric Surgeon,  
Counties Manukau Hospital, Auckland*

With obesity rates continuing to rise in Aotearoa and related health conditions placing significant strain on individuals and the health system, there is growing interest in effective, evidence-based weight management strategies. This webinar will explore the role of bariatric surgery within the broader spectrum of treatment options, including newer medications and endoscopic interventions. It will cover the short-, medium-, and long-term outcomes of surgery, as well as the associated risks, benefits, and costs—supporting informed and equitable decision-making in primary and community care.

Our presenter, Mr Richard Babor, is a General and Bariatric Surgeon with Counties Manukau DHB. He completed his surgical training in New Zealand and Australia. He has specialised in obesity and upper gastrointestinal surgery over the last 16 years. Richard brings deep insight into surgical options for managing obesity and is committed to patient-centred, multidisciplinary care.

This webinar will be of particular use to GPs, NPs, Dieticians, HIPs, Health Coaches and Health Psychologists.
