

YOU'RE INVITED TO A **ZOOM WEBINAR**

DREADED DYSPEPSIA AND H.PYLORI

GASTROENTEROLOGY FOR PRIMARY CARE –
TOP TO TAIL SERIES

**WEDNESDAY 29 APRIL,
7PM – 8PM**

DR CAMERON SCHAUER

*Gastroenterologist, General Physician,
Health New Zealand | Te Whatu Ora - Waitematā*

Dyspepsia is common in general practice, but deciding who to test, treat, or refer can be challenging.

This session will outline a practical, GP-focused approach to dyspepsia and *Helicobacter pylori*. It will cover when “test and treat” is appropriate and who requires early endoscopy, in addition to interpreting alarm features in the New Zealand context (including higher-risk groups). It will address rising antibiotic resistance, first-line eradication choices, and test-of-cure. The aim is to provide you with a safe, practical framework for dealing with this common issue and to leave you with tips you can use in practice immediately.

This webinar is suitable for a wide range of medical professionals especially GPs, NPs and Practice Nurses. District nurses and dieticians may also find this interesting.

Dr Cameron Schauer is a Gastroenterology Consultant at North Shore and Waitakere Hospitals. Half German and half Chinese, raised in Whangārei, and trained at the University of Auckland, he completed a Tokyo fellowship in early endoscopic cancer detection and resection. He is undertaking a PhD focused on early gastric cancer in NZ and lectures at the University of Auckland.
