

YOU'RE INVITED TO A **ZOOM WEBINAR**

ASSESSING & MANAGING MILD TRAUMATIC BRAIN INJURY – CONCUSSION

**WEDNESDAY 9 OCTOBER,
7PM – 8PM**

PROFESSOR ALICE THEADOM

PhD, Professor of Psychology and Brain Health and Director of the TBI Network at AUT / Rutherford Discovery Fellow

There have been a lot of recent advances in how mild traumatic brain injuries (including concussion) should be assessed and managed. There have also been recent changes to ACC processes. This session will provide updates on the latest research evidence, current processes and tools that can assist you as a clinician.

Professor Theadom has been specialising in mild traumatic brain injuries for over 15 years. She has been working with ACC on improving how these injuries are managed to facilitate patient recovery.

The objectives of the session will be to:

- Outline current research evidence on mild TBI
- Provide updates on new ACC processes
- Present a new decision making support tool that can assist clinicians in identifying patients at risk of prolonged recovery

This webinar will be of particular use to GPs, Nurses and allied health professionals working with people following mild traumatic brain injury/concussion.
